Greenwire -- Tue., January 21, 2014 -- [Read the full edition](#)

1. DROUGHT: Californians face 'new reality' of water scarcity

Living with long-term drought could become the "new reality" for California, experts said after Gov. Jerry Brown (D) on Friday officially declared the state's record-shattering water shortage. Water managers, farmers and fishermen are girding themselves for water scarcities in the months ahead. Some fear not only that the drought's effects will be more pronounced than previous dry spells, but that the state might be forced to adjust to less precipitation on an ongoing basis.
